4 Attach the power cord.

Plug the power cord into the compact power adapter, and then the plug into a power outlet.

Attach the compact power adapter connector to the printer's DC IN terminal.

Can I use general printer paper or postcards?

No. Always use paper specific to SELPHY CP series printers included in the genuine Canon brand "Color Ink/Paper Sets".

Paper sets specific to SELPHY ES series cannot be used.

How can I use Card Size or Wide Size paper cassettes?

Card Size and Wide Size paper cassettes are shaped a little differently from the Postcard Size and L Size paper cassettes. Open the outer lid and inner lid, and set the paper into the cassette. Close only the inner lid and insert the paper cassette into the printer.

Note that unlike inkjet printers, SELPHY series printers cannot print any more prints than those noted on the color ink/paper set packages.

Printing by Connecting Your Camera

If your Canon digital camera has a  (Print/Share) button, you can connect the camera to the printer for easy printing.

- 1 Pull the cable out of the printer and attach it to the camera's DIGITAL terminal.**

- 2 Press and hold the printer's power button until the start-up image displays on the LCD monitor.**
- 3 Select an image on the camera's LCD monitor and press the  (Print/Share) button.**

Non-Canon brand cameras that are compliant with PictBridge can also be used. If the connector on the cable does not fit your camera's terminal, use the USB cable supplied with your camera. Refer to your camera's operation manual for further details.

Printing from Mobile Phones

The CP750 can print without a cable connection from a mobile phone that supports infrared data transmission (IrDA, IrSimple). If you use a mobile phone that supports the Bluetooth protocol, you can print wirelessly with the separately sold Bluetooth Unit BU-20.

Up to approximately
20 cm (7.9 in.)

The distance over which infrared data signals can be transmitted varies according to the mobile phone model and transmission environment.

The signal transmission distance for Bluetooth is about 10 m (32.8 ft.).

Troubleshooting

Solutions for when you cannot print as expected, or think the printer is not operating properly.

Power will not turn on...

Did you press and hold the power button until the start-up image displayed? Check the compact power adapter, the main printer unit and the power cord to ensure that they are correctly connected.

Cannot print...

Have you run out of ink sheets? SELPHY series printers cannot print any more than the number of prints indicated on the color ink/paper cassette packages. The starter ink cassette can be used to print 5 sheets. Check that you are using the correct paper, paper cassette, and ink cassette combination.

I have extra paper but the ink ran out...

Some ink may be consumed even if you don't print if you tug on the ink sheets or needlessly turn the power on/off repeatedly. Also, the ink can be wasted if you take out the ink cassette when the paper sheets run out during a multiple print run. Remove the paper cassette and replenish the paper without removing the ink cassette.

Cannot print cleanly...

Did you set paper specific to SELPHY CP series printers in the cassette with the shiny side upward as required? If the ink sheet becomes dusty, blow it clean with a blower brush or similar device. If narrow stripes appear, remove the ink cassette and slide the supplied cleaner in and out two or three times to clean the interior of the printer.

Images will not appear even with a memory card inserted...

Confirm that the memory card is inserted all the way into the correct slot. Also confirm that the images conform to the Design rule for Camera File system.

Cannot set the mode, print layout, date imprint and print number as expected...

Some categories cannot be selected or are disabled with certain combinations of print mode, print layout, date imprint and print numbers.

Experiencing numerous paper jams...

Placing 19 or more sheets in the paper cassette (13 or more Wide size sheets) will lead to mis-feeds or paper jams. Moreover, do not let 10 or more sheets of printed paper collect on top of the paper cassette.
